 nudibranchs, 2 species
 of giant glams and home
 to the endangered coconut
 crab...

Our contribution towards the development of today's youth when we all are in the midst of Global Warming, Species Extinction, Food and Water Shortages...

For 5 days and four nights, children come and live together in a small island with teachers who are in the forefront of forest and marine conservation. In an island that is an excellent natural classroom with limestone, beach, and mangrove forests; 5 lagoons, batcaves, seagrass beds, and coral reefs. An island whose forests and reefs host an incredible diversity of terrestrial and marine species...

The **DANJUGAN ISLAND YOUTH MARINE and WILDLIFE CAMP** is a learning experience beyond schools and textbooks. And it will be fun too!

**campers, instructors & facilitators*
